

Privacy Policy for InnerSpace.ED

Effective date: 12 September 2026

Version: 1.0

1. About this Privacy Policy

This Privacy Policy explains how personal data is processed when visitors and professional users access and use the InnerSpace.ED website and web application, currently available at:

<https://innerspaceed-five.vercel.app>

Once a custom domain is connected, its address will be added to this Privacy Policy.

InnerSpace.ED is a non-medical digital support tool intended for use by qualified professionals. It does not make diagnoses, prescribe treatment, or replace professional clinical judgement.

InnerSpace.ED does not currently provide user accounts and does not operate its own application server or database for storing test responses, exercise results, camera images, gaze data, or client information.

The website is delivered using third-party hosting infrastructure. As a result, limited technical data may be processed when a visitor accesses the website.

2. Data Controller

The controller responsible for the processing of personal data in connection with InnerSpace.ED is:

Karina Zueva

Address:

Munich
Germany

Email: info.innerspace.ed@gmail.com

A Data Protection Officer has not been appointed.

3. Intended Users

InnerSpace.ED is intended for professional use.

The service is not directed at children or minors as independent users.

Where a professional chooses to use InnerSpace.ED during a session involving a minor, that professional is responsible for:

- determining whether the use of the tool is appropriate;
- providing the minor with information in an understandable form;
- obtaining consent from a parent or legal guardian where required;
- complying with applicable legal, ethical, and professional obligations.

InnerSpace.ED does not request, receive, or store information about a client's age.

4. Accessing the Website and Technical Logs

4.1 Technical data

When a visitor accesses the website, the visitor's browser connects to the infrastructure used to deliver InnerSpace.ED.

The following technical data may be processed:

- IP address;
- date and time of the request;
- requested page or file;
- referring page;
- browser type and version;
- operating system and device type;
- language and technical settings;
- information concerning errors, performance, and security;
- approximate location derived from the IP address.

This information may be included in technical logs maintained by the hosting provider.

InnerSpace.ED does not use this technical information to diagnose users, assess their health, or build advertising profiles.

4.2 Purposes of processing

Technical data may be processed for the following purposes:

- delivering the website to the visitor's device;
- maintaining the stability and performance of the service;
- protecting the website and its infrastructure;
- detecting and preventing misuse or malicious activity;
- investigating technical errors.

4.3 Legal basis

The legal basis for this processing is Article 6(1)(f) of the General Data Protection Regulation ("GDPR").

The legitimate interests pursued are the secure, reliable, and technically functional operation of the website.

4.4 Retention

InnerSpace.ED does not independently create or maintain a separate visitor log database.

Technical data may be retained by the hosting provider for as long as reasonably necessary to provide the hosting service, protect its infrastructure, prevent misuse, investigate errors, and comply with applicable legal obligations.

The exact retention period may depend on the configuration and terms of the hosting plan.

5. Hosting by Vercel

The website is hosted and delivered using services provided by:

Vercel Inc.

United States

<https://vercel.com>

In connection with the provision of its services, Vercel may process technical information such as IP addresses, request information, device and browser information, system configuration, diagnostic information, and an approximate location derived from the IP address.

Depending on the infrastructure used, personal data may be processed outside the European Economic Area, including in the United States.

Further information about Vercel's processing activities, subprocessors, international transfers, and safeguards is available in the following documents:

- [Vercel Privacy Notice](#)
- [Vercel Data Processing Addendum](#)
- [Vercel Legal and Privacy Documents](#)

InnerSpace.ED does not intentionally transmit test responses, exercise results, camera images, gaze coordinates, or attention maps to Vercel as application data.

6. Local Processing Within InnerSpace.ED

6.1 Information entered into interactive features

Information entered or generated while using the interactive features of InnerSpace.ED is processed locally in the user's browser.

Depending on the feature being used, this information may include:

- avatar settings and body parameters;

- food selections and actions within a virtual environment;
- self-reported anxiety ratings;
- responses to questionnaires;
- calculated questionnaire results;
- gaze coordinates;
- a visual attention map.

This information:

- is not transmitted to an InnerSpace.ED server;
- is not stored in an InnerSpace.ED database;
- is not accessible to the operator of InnerSpace.ED;
- is not used for advertising or user profiling;
- is not shared with analytics providers;
- remains under the control of the user and the user's browser.

Information held only in the active browser session is generally removed when the relevant page is refreshed or closed.

If a user creates a screenshot, copies a result, downloads information, or otherwise stores information using their own device, that copy is created and retained under the user's control.

Professionals are responsible for obtaining any necessary consent before recording or retaining client-related information and for storing such information securely.

6.2 No automated decision-making

InnerSpace.ED does not use information entered into the interactive features to make automated decisions that produce legal or similarly significant effects.

Questionnaire scores and other results do not constitute a diagnosis and are not transmitted to the operator of InnerSpace.ED.

7. Camera Access and Eye-Tracking

The eye-tracking feature operates only after the user actively starts it and grants the browser permission to access the camera.

When the feature is used:

- the camera stream is processed locally on the user's device;
- video and individual camera frames are not transmitted to a server;
- video and camera frames are not stored by InnerSpace.ED;
- gaze coordinates are calculated locally;
- the visual attention map is generated locally in the browser;
- facial recognition is not performed;
- the feature is not used to identify the user;
- no biometric identity profile is created.

Camera access can be stopped by stopping the feature, closing the page, or withdrawing camera permission through the browser settings.

Where the feature is used with a client, the professional is responsible for informing the client about the use of the camera and obtaining any consent required for that use.

Refusing camera access does not prevent the use of other sections of InnerSpace.ED.

8. Browser Local Storage

InnerSpace.ED uses the browser's local storage functionality for a limited preference selected by the user.

The current version may store the following item:

`innerspace_ed_avatar_consent`

This item records that the user has chosen not to display the professional-access notice for the avatar section again.

The item:

- is stored only on the user's device;
- does not contain the user's name or email address;
- does not contain questionnaire responses or exercise results;
- is not transmitted to InnerSpace.ED;
- is created only if the user selects the relevant "remember" option;
- remains until it is removed through the browser or website-data settings.

Under Section 25 of the German Telecommunications Digital Services Data Protection Act ("TDDDG"), storing information on a user's device generally requires the user to receive clear information and provide consent unless the storage is strictly necessary for a service explicitly requested by the user.

In this case, the preference is stored following the user's explicit choice to remember that decision.

9. Cookies and Analytics

The current version of InnerSpace.ED does not use:

- advertising cookies;
- analytics cookies;
- marketing pixels;
- Google Analytics;
- Vercel Web Analytics;
- Vercel Speed Insights;
- session-replay technology;
- advertising or behavioural profiling.

InnerSpace.ED therefore does not currently display a consent banner for analytics or advertising cookies.

If analytics, advertising technology, optional cookies, or similar tracking technologies are introduced in the future, this Privacy Policy will be updated. Consent will be requested before activating such technologies where required by applicable law.

10. Contact by Email

Users may contact InnerSpace.ED at:

info.innerspace.ed@gmail.com

When a person contacts InnerSpace.ED by email, the following information may be processed:

- email address;
- sender name or other information included in the email account;
- message content;
- date and time of correspondence;
- attachments voluntarily included by the sender;
- technical information contained in email headers.

The information is processed for the purpose of:

- responding to enquiries;
- providing support;
- organising participation in a closed pilot;
- receiving technical feedback;
- maintaining necessary records of correspondence.

Depending on the nature of the communication, the legal basis is:

- Article 6(1)(b) GDPR, where processing is necessary to respond to a request or take steps connected with participation in a pilot; or
- Article 6(1)(f) GDPR, based on the legitimate interest in responding to enquiries, supporting users, and improving InnerSpace.ED.

Email is provided through Gmail, a service of Google. For users in the European Economic Area, Google consumer services are generally provided by:

Google Ireland Limited

Gordon House
Barrow Street
Dublin 4
Ireland

Google may process information on servers located outside the country in which the sender or recipient is located.

Further information is available in the [Google Privacy Policy](#) and its information about [international data-transfer frameworks](#).

Users must not send the following information by email:

- client names or contact details;
- medical histories;
- diagnoses;
- questionnaire responses;
- exercise results;
- photographs or videos of clients;
- identifiable client screenshots;
- other confidential client information.

If such information is sent without being requested, it will be deleted after it is identified unless retention is required by law.

11. Closed-Pilot Feedback Through Telegram

Feedback from professionals participating in a closed pilot may be collected through Telegram.

If a participant voluntarily contacts the operator through Telegram, the following information may be processed:

- Telegram profile name or pseudonym;
- Telegram username;
- profile image, where visible;
- message content;
- date and time of correspondence;
- technical feedback about the service.

The purposes of this processing are:

- organising participation in the closed pilot;
- providing access and support;
- investigating technical problems;
- collecting feedback;
- improving InnerSpace.ED.

Depending on the context, the legal basis is:

- Article 6(1)(b) GDPR, where processing is necessary to organise participation or respond to the participant's request; or
- Article 6(1)(f) GDPR, based on the legitimate interest in operating, supporting, and improving the pilot.

Pilot correspondence will normally be deleted no later than six months after the relevant participant's involvement has ended, unless:

- the participant requests earlier deletion;
- the information is still required to resolve an ongoing matter; or
- longer retention is necessary for the establishment, exercise, or defence of legal claims.

Participants must not send client personal data, health information, questionnaire results, screenshots containing identifiable client information, or other confidential clinical material through Telegram.

If such information is sent without being requested, it will be deleted after it is identified unless retention is required by law.

Telegram is a separate service and processes personal data under its own terms and privacy policy. Telegram may process data outside the European Economic Area.

Further information is available in the [Telegram Privacy Policy](#).

Participation in the pilot must not be made conditional on sending client information through Telegram.

12. Recipients of Personal Data

Depending on how a visitor uses the website or contacts its operator, limited personal data may be received by:

- Vercel, for hosting, delivering, and protecting the website;
- Google, when a person communicates with InnerSpace.ED by email;
- Telegram, when a participant voluntarily uses Telegram to communicate about the pilot;
- public authorities, where disclosure is required by applicable law.

InnerSpace.ED does not sell personal data and does not disclose personal data to advertising networks, data brokers, or marketing platforms.

13. International Data Transfers

Vercel, Google, Telegram, or their service providers may process personal data outside the European Economic Area.

Where required, international transfers must be supported by an applicable legal mechanism, such as:

- an adequacy decision adopted by the European Commission;
- approved Standard Contractual Clauses;
- participation in an applicable recognised data-transfer framework; or
- another lawful safeguard permitted by the GDPR.

Further information about the transfer mechanisms used by each provider is available in the privacy and legal documents linked above.

14. Security

InnerSpace.ED uses technical measures intended to protect the website and minimise the amount of personal data processed.

These measures currently include:

- encrypted HTTPS connections;
- restriction of camera access to the website's own origin;
- no access to the user's microphone or geolocation;
- protection against third-party framing of the website;
- restrictions on sources from which website content may be loaded;
- no proprietary database containing client responses;
- local processing of questionnaire results and camera data;
- no advertising or behavioural tracking.

No method of transmitting or processing information electronically can provide absolute security. Users should therefore avoid transmitting confidential client information through ordinary email, Telegram, or other unsecured communication channels.

15. Data Retention

InnerSpace.ED applies the principle that personal data should not be kept for longer than necessary.

Subject to the more specific provisions above:

- information processed only in the active browser session is not retained by InnerSpace.ED;
- the local-storage preference remains on the user's device until the user removes it;
- email and pilot correspondence will normally be deleted no later than six months after the relevant enquiry or participation has ended;
- information required for the establishment, exercise, or defence of legal claims may be retained for the applicable limitation period;
- technical hosting information is retained according to the hosting provider's applicable configuration, security requirements, and legal obligations.

16. Rights of Data Subjects

Subject to the conditions of applicable data-protection law, individuals may have the right to:

- receive information about the processing of their personal data;
- obtain access to their personal data;
- request correction of inaccurate data;
- request deletion of their data;
- request restriction of processing;
- object to processing based on legitimate interests;
- receive data in a portable format where applicable;

- withdraw consent at any time with effect for the future, where processing is based on consent;
- lodge a complaint with a competent data-protection authority.

Because questionnaire responses, exercise results, camera images, and gaze information are not transmitted to InnerSpace.ED, the operator cannot access, correct, export, or delete such information from the user's device.

Users can remove local information by closing or refreshing the relevant page and by clearing the website's data through their browser settings.

Requests concerning data-protection rights may be sent to:

info.innerspace.ed@gmail.com

17. Right to Object

Where personal data is processed on the basis of Article 6(1)(f) GDPR, the individual has the right to object to the processing on grounds relating to their particular situation.

InnerSpace.ED will stop the relevant processing unless compelling legitimate grounds exist that override the individual's interests, rights, and freedoms, or unless the processing is necessary for the establishment, exercise, or defence of legal claims.

18. Right to Lodge a Complaint

Individuals have the right to lodge a complaint with a competent data-protection supervisory authority.

For private-sector and independent activity carried out from Bavaria, the competent supervisory authority will generally be:

Bayerisches Landesamt für Datenschutzaufsicht — BayLDA
Promenade 18
91522 Ansbach
Germany

Website: <https://www.lda.bayern.de>

Complaint form: <https://www.lda.bayern.de/de/beschwerde.html>

An individual may also contact another competent supervisory authority, including the authority responsible for their habitual residence or the place of an alleged infringement, where applicable.

19. Changes to this Privacy Policy

This Privacy Policy may be updated if:

- the website's functionality changes;
- user accounts or server-side storage are introduced;
- analytics or payment services are added;
- the providers used by InnerSpace.ED change;
- applicable legal requirements change.

The current version will be made available on the website. Its effective date and version number will be displayed at the top of the document.

Where a change materially affects the processing of personal data, additional notice or consent will be provided before the new processing begins where required by law.
